HALOVAULT

BLOCKCHAIN VERIFICATION EDITION
HV-CERT-F1FD1566AA

Public blockchain record

This edition accompanies HaloVault AI grade certificate HV-CERT-F1FD1566AA. It does not replace or change the issued certificate. The certificate itself is sealed in HaloCert, HaloVault's internal tamper-evident ledger (not a public blockchain). The record below is a separate, finalized transaction on the public Base blockchain.

How to verify: compute SHA-256 of the canonical commitment JSON published at https://halovault.ai/api/cert/HV-CERT-F1FD1566AA/ (field public_blockchain_record.payload; keys sorted, no whitespace, UTF-8) and compare it with the hash in the transaction data above.

A blockchain record proves that this commitment existed no later than the finalized block. It is not a physical-card authentication, not a third-party grade, not a valuation, and token control is not legal ownership or custody of the card.
